Bred at Beaver Creek Farms (Lawton, OK), Cowboy is the result of a decades-long process of refinement by Carol Brown and Tommy Gunn. Their selection for exemplifying breed standards and grass-finishing, tender beef culminated in this genetic package. Tested free of all known Murray Grey genetic defects: MYO, MA, AM, CA, DD, NH, PF/PFD, TH.

Proven to be a reliable option for heifer-safe calving ease, without compromising on growth and capacity. Hes run in high elevation mountain pastures, low river bottom fields and dryland range and thrives in all. Measuring at a Frame 5, Duke is an extremely easy keeper who is structurally sound with stellar hooves, a clean tight sheath, heat/cold tolerant, parasite/fly resistant, sheds quickly with a fine slick coat, and he tops it off with a classic MG temperament. Calves average 75 lbs. He crosses exceptionally well with broody-type females. (Pictured at 3 years old mid-breeding season.)

A young, up-and-coming star who we believe has the makings to leave a big mark on the MG breed! At 5.5 months old and with 60+ head showing he was the 2024 National Supreme Champion MG. He is an ultra-correct son of the 2023 Supreme Champion dual-purpose superstar cow, Stillwater Motley 12G, who is from a highly fertile, maternal, & moderate line with ultra-correct grass-type females that boast beautiful hoof & udder. His sire is a "heritage" black bull of 100% AUS lines. 11M is the ONLY recorded offspring in the last decade by Blackhawk. His pedigree is rare. Daughters should be exceptional.

We believe 141L has a bright future as a notable sire with merits to both maternal and carcass strengths. This bull is incredibly well balanced, and out of a powerhouse female. Sired by Australian import, Tarlina Coomunga C57. Lachesis has looked like a serious prospect since day one and keeps getting better. Raised on grass, pictured at 11 months.

112L is a great bull for those looking to add tenderness genes to their replacements. A small percentage of cattle possess a perfect 10 in tenderness. We consider him a female making bull backed by fertility, milking ability, as well as great hoof and udder. Last Call was a high seller in the Stillwater production sale with interest from both commercial and registered programs. Raised on grass and pictured at 18 months old.

Xpress is a very complete, stout made & moderately framed bull. He should meet the need of programs improving hindquarter development, and those looking for growth in tough environments. Xpress sold and carried on to a commercial herd as a 9 year old, displaying longevity despite his impressive growth and stature. He is recommended for cows, yet has been considered calving ease with his small head and nice shoulders.

5326K is of the first Murray Grey bulls to pass Pharo Cattle Company's impressive selection process & forage based feed test. Star is small framed & meaty, perfect for those looking for animals to fit Square Meater perimeters. Star was used confidently on all of our yearling heifers in 2024, and his perfect 10 in tenderness is ideal for a grass finished beef program. Pictured here at 2 years old.

K55 combines industry leading growth with the functional necessities of grass focused management. K55 developed in an outstanding way, reaching fast maturity and size in an intensive grazing platform. His well rounded performance has exceeded any bull we've raised to date. He is fast slicking, parasite & fly resistant, sound footed, and exceptionally docile. Pictured here at 2 years old. Kilos calves have come unassisted and average in the 80's.

Meet our herd sire, CMG THUNDER: the powerhouse behind our herd, and the key to our success in developing Prime-grade beef. We raise free-range, grass-fed, all natural cattle. CMG THUNDER boasts top Beef genetics with a low RFI score, meaning less feed for optimal results. His low birth weight and docile temperament make him a standout. We're proud to offer top-notch genetics that deliver quality, consistency, and profitability for the beef industry. That's the Happy Cow way! CMG THUNDER is the future of premium beef.

Victory Grant. Grant is a son of HA McKinley. McKinley is son of the Glen Manual, & HA Robern MR Muscles Wallflower. His dam is a longevity female out of HA Dana & Temar Lotus, Grant produces soft muscled beautiful feminine females. His 2 son's out of Power Play's sister are high in tenderness and thick and deep. Very quiet offspring. He's a lower birth weight bull and is suitable with heifers.

Monterey Reflection combines exceptional phenotype with breed-leading EBV's. With over 35 progeny on the ground in Australia and almost 20 in the US he is well on his way to making his mark on the breed. Reflection is a big powerful bull with scale and incredible growth but also has amazing structure which allows him to move with ease. His calves consistently inherit his thick muscle pattern, adequate bone, length of body, and an outstanding temperament. If your looking for a bull with exceptional performance and phenotype to match look no further.

Stored: Hoffman Breeders, Logan Utah

WestRidge Justifiable was a stand out from birth. At his 205 day weighing he was 100 lbs heavier than the next heaviest bull in his contemporary group. His dam is a power house female that produces top of the drop calves every year. He sires smaller birth weight calves and has been used on a small hand full of heifers successfully. From the small sampling of calves in his first crop, he consistently added length and good thickness with a good temperament.
